Statement from the IB DP coordinator Anna Martikainen regarding proposed changes to the admissions policy of Mattlidens gymnasium IB programme:

I fully support the proposal to increase the weighting of English and mathematics for applicants to our IB programme (preDP) from Finnish comprehensive schools. This weighting is in line with the importance of competence in both subjects in order to successfully complete the IB diploma programme.

This model is in use in many Finnish schools which offer the IB Diploma Programme, including Etelä-Tapiolan lukio. It is important that we have the same admission requirements so that applicants to both schools are chosen in the same way and have equal qualifications to succeed in their studies.

Anna Martikainen

IB DP coordinator, Mattlidens gymnasium
